QA Assessment

As the next step in our interview process, we would like to hear about how you would handle the following hypothetical scenarios. **Please do not use chatGPT.**

1. Why are you interested in joining Veriswap? Please submit a short video (if you have not already).

2. Below is a user's trade summary page, which shows the statuses of all of user A's transactions with user B.

A. How you would set up user A and user's B's accounts to prepare for testing the various trading scenarios?
B. Develop a test set for our trading flow. Be as exhaustive as possible.

3. Play around with the app for a few minutes until you find a bug. Please write a comprehensive bug report for this hypothetical bug and include all relevant information.

4 Please submit a video recording explaining the above bug.

5. Spend a few minutes browsing the app. How would you prioritize the flows on this app in terms of p0 (critical), p1 (high-priority), and p2 (nice to haves).
